

## Business Process Reengineering (BPR)

### Need for BPR

Global financial uncertainty has forced organizations to operate their business processes in an intensively complex & challenging environment. In such an environment organization must have the ability to navigate these challenges to deliver value to shareholders & stakeholders.

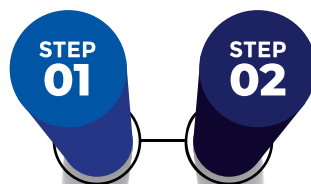

Business Process Reengineering (BPR) can be a game-changer for any business. Business Process Reengineering (BPR) is a process of reimagining, rethinking and redesigning the way work is performed to encourage the organization towards fulfilling its mission and achieving extraordinary results.

### When do you require BPR

BPR can be required in two major scenarios:

*In a scenario where you or your organization has figured out some revolutionary transformations that could change the face of your business and help you lead the market. When you are not sure how to go about it, you require help from experts or Business Process Reengineering (BPR) Consultants, to help you through the process.*

*If you have realized that you/your organization are unable to keep up with the current dynamic changes of the market, technology and business processes, you might require to do away with the issues that you might be facing currently in your business processes. This requires revamping the whole flow of operations to ensure that your business is not stagnated. In such a scenario, Insight's Business Process Reengineering (BPR) Consultants can help you through this process seamlessly.*

## Approach & Methodology for BPR

To keep business process reengineering fair, transparent and efficient, stakeholders need to get a better understanding of the key steps involved in it. We help you improve your customer experience and ensure these improvements are practical and sustainable. Although the process can differ from one organization to another, the following is the approach we use to prosper your business process.

- 1 A holistic analysis of your organization's current state and pain points
- 2 Leadership and change management support
- 3 Proactive identification of process ownership for clear roles and responsibilities
- 4 Identification of process enablers and constraints to inform our change impact analysis
- 5 Organizational structure redesign and cross-functional alignment of business processes
- 6 Design a cutting-edge future-state process map
- 7 Integrated implementation recommendations and roadmap
- 8 Ongoing implementation, post-implementation and benefits realization services

## Why Insights

At Insights we help organizations take lead in adopting a new approach & to eliminate non-value-added business processes/sub-processes. Our BPR initiatives & business process management services enable the integration of people, processes and technology. We focus on integration in order to:
