Preparing GL Reports

05

Preparing GL report with itemized or summarized journal entries in flexible file format depending on the needs of your accounting department.

Introduction

While operating across borders and employing an international workforce, one needs careful planning and scrutiny so that you are both fully compliant with your global HR policies and procedures, and more importantly with local regulation requirements. Companies that are non-compliant will risk facing legal sanctions including fines, being banned from applying for new work permits and may suffer reputational damage.
